

TITLE 410 INDIANA STATE DEPARTMENT OF HEALTH

Summary of Changes between Proposed Rule and Final Rule LSA #12-617

Changes are highlighted

1. In 410 IAC 34-1-11, changed the word “is” to “refers to”. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

Sec. 11. "National Trauma Data Bank" or "NTDB" refers to an aggregation of national trauma registry data maintained by the American College of Surgeons. *(Indiana State Department of Health; 410 IAC 34-1-11)*

2. In 410 IAC 34-1-14, removed the hyphen in the word “System excluded”. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

Sec. 14. "Rehabilitation hospital" means a hospital that is Prospective Payment System excluded under 42 CFR 412. *(Indiana State Department of Health; 410 IAC 34-1-14)*

3. In 410 IAC 34-1-16, added abbreviation “(ACS)” after American College of Surgeons to provide clarification for the remaining abbreviations in the rest of the section. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

Sec. 16. "Trauma center" means a hospital that provides trauma care and has been verified as a trauma center by the American College of Surgeons (ACS), has been designated a trauma center under a state designation system that is substantially equivalent to the ACS verification process, or has been deemed to be in the process of ACS verification pursuant to 836 IAC 1-2.1. *(Indiana State Department of Health; 410 IAC 34-1-16)*

4. In 410 IAC 34-5-1(a), added “as follows:” to beginning of list at end of sentence. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

Sec. 1. (a) The department shall establish and use the registry to collect and analyze data that is necessary to evaluate the delivery of trauma care within the state as follows:

5. In 410 IAC 34-5-1(c), changed the word “will” to “must” in two places. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

(c) Hospitals **must submit data to the registry using the criteria in the Indiana Trauma Registry Data Dictionary. Rehabilitation hospitals **must** submit data to the registry using the Indiana Rehabilitation Hospital Registry Data Dictionary.**

6. In 410 IAC 34-5-1(d), changed the word “will” to “must” per a suggestion made by LSA in the marked-up copy of the proposed rule. Added the wording “most current version” of the NEMSIS data elements and deleted the reference to 836 IAC 1-1-5 per the comment received by Michael Lockard from Talley Medical-Surgical Eye Care Associates. This change will ensure that the rule continues to be effective when new versions of the NEMSIS data elements are released. Deleted “National EMS Information System” since it was already defined in the definitions rule and deleted the parentheses around NEMSIS since they were no longer necessary after receiving a suggestion from LSA.

(d) EMS providers **must submit data to the registry using the **most current version of the NEMSIS data elements and the criteria in the Indiana EMS Data Dictionary.****

(Indiana State Department of Health; 410 IAC 34-5-1)

7. In 410 IAC 34-6-1(b), changed the word “shall” to “must”. This was a suggestion made by LSA in the marked-up copy of the proposed rule that was returned to ISDH.

(b) The data required to be provided to the registry by EMS providers **must be reported to the registry by the fifteenth day of the month following the month in which the incident occurred.** *(Indiana State Department of Health; 410 IAC 34-6-1)*
